

I am privileged and grateful to have served you on the city council the past four years (one term) and would love the opportunity to continue to do so.

I have a B.S. in Digital Media from UVU and am a .NET developer for a start-up providing inventory management solutions for Ford dealerships.

My wife, Adelle, and I have been married since 2008. We have one almost 4 year-old son and have lived in Eagle Mountain since 2014.

Eagle Mountain is unique, a fast-growing community with a small-town feel. My goal is to keep that look and feel by placing value on open-space, outdoor recreations, low taxes, and budgetary focus of needs before wants. I have done that and pledge to continue.

Some of my record/accomplishments:

- Communicated regularly with residents.
- Helped bring in two fortune 100 companies (securing infrastructure and jobs).
- Protected open space and wildlife.
- Pushed for larger lot sizes and held developers accountable for their promises.
- Prioritized Infrastructure: improving safety and quality of life.
- Prioritized maximizing rainy-day funds every year.
- Funded 5 new stoplights, multiple widening projects, and more street maintenance.
- Did NOT raise your taxes.
- Helped add additional events/services through limited public/private partnerships (not budget increases).
